

5 Attempt any two parts of the following :

- (a) Draw and explain the block diagram of general purpose CRO. How frequency and phase angle are measured by CRO ?
- (b) Write short notes on :
- (i) Types of probe
 - (ii) Digital signal generator.
- (c) Describe the basic circuit of spectrum analyzer. Also explain the different types distortion caused by amplifier.

Printed Pages : 4

TEC303

(Following Paper ID and Roll No. to be filled in your Answer Book)

PAPER ID : 3075

Roll No.

B.Tech

**(SEM III) ODD SEMESTER THEORY EXAMINATION 2009-10
ELECTRONICS MEASUREMENTS & INSTRUMENTATION**

Time : 3 Hours]

[Total Marks : 100

- Note :**
- (i) Attempt all questions.
 - (ii) Each question carries equal marks.

1 Attempt any **four** parts of the following :

- (a) Distinguish between the direct and indirect method of measurements. Give examples.
- (b) Explain the terms :
- (i) Static error
 - (ii) Static correction
 - (iii) Relative error.
- (c) Define the terms :
- (i) Accuracy
 - (ii) Precision
 - (iii) Resolution
 - (iv) Linearity.

- (d) Define :
- (i) mean value
 - (ii) deviation
 - (iii) variance.
- (e) List the advantages of electronic measurement.
- (f) How the performance characteristics of an instrument are classified ?

2 Attempt any **four** parts of the following :

- (a) Differentiate between the following :
- (i) Transducer and inverse transducers
 - (ii) Analog and digital transducers.
- (b) Describe the working and construction of resistance thermometers.
- (c) How is a differential output taken from an inductive transducers ?
- (d) Describe the different modes of operation of piezo-electric transducers.
- (e) Derive the general equation for an a.c. bridges.
- (f) Derive the equation of balance for an Anderson's bridge.

3 Attempt any **two** parts of the following : **10×2=20**

- (a) Explain why PMMC instruments are most widely used instruments, also describe the working of RMS responding voltmeters.

- (b) Explain the construction and working of electronic-analog ohm meter. Also briefly describe the working principle of multimeter.
- (c) Write short notes on :
- (i) AC voltmeter and ammeter
 - (ii) Application of LCD.

4 Attempt any **two** parts of the following :

- (a) Describe the following terms used in conjunction with digital to analog conversion :
- (i) Discrete levels
 - (ii) Resolution
 - (iii) Quantization error
 - (iv) Decision levels .
 - (v) Aperture time.

Describe in details the dual slope method of analog to digital conversion.

- (b) Explain the functioning of a 5×7 LED matrix display. Also explain the sensitivity of digital meters and accuracy specification of digital meters.
- (c) Write short note on : Performance characteristics of D/A converter and its application
