

GUEST LECTURE on “Environment and Effects of Enzymes on it”

A guest lecture was held on 27 September'16 in Auditorium as per the following details:

Name of the Speaker : **Mr. Anil Kapoor**
Title & Affiliations : **Consultant Environmentalist
SSRDP TRUST (Sri Sri Rural
Development), Bangalore**

The lecture was attended by students of B.Tech in Civil Engineering of all years starting from IInd year.

The lecture covered in general the reasons for generation of green waste and urgent need for protection of the environment. The speaker emphasized that each time we use cleaning products made with chemicals, we are already polluting the underground water, rivers and the surrounding eco-system. Conventional cleaning products usually contain harmful chemicals such as phosphate, nitrates, ammonia, chlorine etc. The accumulation effect of these chemicals released from every household causes significant damage to the planet earth.

Mr. Kapoor stressed upon the need to use Eco-enzyme, a complex solution produced by fermentation of fresh kitchen waste (fruit and vegetable dregs), sugar (brown sugar, jaggery or molasses sugar) in water, as general cleaner, purifier, insect repellent, laundry cleaner, car care, organic fertilizer etc.
