

INDUSTRIAL VISIT TO BHEL

An Industrial visit was conducted for students of 4th Year Electrical & Electronics Engineering Department on 14 October 2016. Students were accompanied by Mr. Ashutosh & Mr. S C Diwedi.

The Visit proved beneficial to the students as the students could understand the status of the division of the plant (BHEL Plant) into various Blocks, Department, Auxiliary units & Laboratories as well as the latest manufacturing techniques employed to produce quality product. It gives a wholesome picture of how work is carried out at BHEL in the different blocks present there & an overview of the coordinated & well planned, systematic manner in which these blocks feed each other to make a desired product.

Overall the students were satisfied with the learning outcomes achieved through the visit and have requested department to arrange for more of such visits at frequent intervals.
