

INDUSTRIAL VISIT TO PROJECT SITE

An Industrial visit was conducted for students of IInd Year Civil Engineering on 29th and 30th September 2016. Students were accompanied by Prof. Sanjay Gupta and Mr. Lovish Jain to project site of residential towers under construction by M/s Landcraft Developers Pvt. Ltd, Ghaziabad.

The Visit proved beneficial to the students as the students could understand the status of ongoing construction through Architectural and Structural Drawings. Students could get a feel of the advantages and methodology of erecting Aluminium formwork for RCC works under use at the project site. Reinforcement detailing of beam, Columns, slabs and shear walls was explained to the students through structural drawings. Students could also appreciate the use of chicken mesh for plastering works at locations where Electrical conduit work was required to be done in the walls. Overall the students were satisfied with the learning outcomes achieved through the visit and have requested department to arrange for more of such visits at frequent intervals.
